SHUBITSON S

IT PMO SPECIALIST | DELIVERY OPERATIONS | PROJECT GOVERNANCE | SMART MANUFACTURING

Coimbatore, Tamil Nadu, India | +91 84388 90442 | shubitson.s@gmail.com | linkedin.com/in/shubitson

PROFESSIONAL SUMMARY

IT PMO professional with about four years of experience across PMO governance, project coordination, delivery operations, revenue operations, and MES/Smart Manufacturing programs. Coordinated six concurrent implementations with a combined value of about ■12 crore, supporting project planning, RAID, milestones, dependencies, resources, cost, revenue, procurement, timesheets, reporting, and executive governance. Experienced in standardizing an 8-phase delivery lifecycle and presenting delivery, financial, and portfolio information to Directors, VPs, and the CEO. Building practical PMO automation and AI-PMO Control Tower concepts for centralized project and portfolio visibility.

CORE PMO COMPETENCIES

- PMO Governance: Project governance, portfolio reporting, delivery controls, stage gates, milestone tracking, RAID, dependencies, escalations, governance cadence and action tracking
- Project Planning & Control: MS Project scheduling, lifecycle coordination, planned vs actual tracking, milestone visibility, schedule follow-up and cross-project coordination
- Resource Management: Resource allocation, utilization tracking, timesheets, estimated vs actual effort and project resource planning
- Financial & Commercial Operations: Budget and cost tracking, variance reporting, revenue forecasting, PO/PR governance, invoice tracking, payment status and CRM pipeline coordination
- Risk, Issue & Change Coordination: Risk and issue tracking, mitigation follow-up, blockers, dependencies, escalation and change/scope coordination
- Reporting & Executive Communication: Weekly status reports, steering committee decks, dashboards, MOM, action trackers and executive reporting
- Process & Automation: SharePoint governance, standard templates, version control, Power Automate and AI-enabled PMO reporting concepts

PROFESSIONAL EXPERIENCE

CANTIER SYSTEMS | Nov 2022 – Present

Career progression: MES Trainer → Senior Product Support Engineer → PMO Project Coordinator → Junior PMO Executive

Junior PMO Executive | Jun 2026 – Present

- Run weekly deliverable and status calls for four projects; track actions, owners, due dates and closure.
- Coordinate project resource allocation and monitor utilization across active projects.
- Track project financial cost against budget, identify variances and report financial status to management.
- Support management reporting by consolidating project delivery, resource and financial information.

PMO Project Coordinator | Nov 2024 – Present

Programs: TEPL, MRF, AIS, Sona Comstar, Lumax, Brakes India | MES, IIoT and Digital Manufacturing

- Coordinate PMO governance and delivery operations across six concurrent implementations with a combined value of ■12 crore.
- Coordinate the end-to-end 8-phase delivery lifecycle on SharePoint: Initiation, Requirements, Planning, Development, Testing, Deployment, Post-Implementation and Governance.
- Maintain standard PMO templates, document version control, project artifacts, sign-off workflows and governance records across project phases.
- Maintain MS Project master schedules and coordinate milestone updates, planned activities, dependencies and delivery follow-ups across concurrent programs.
- Coordinate weekly RAID reviews covering risks, issues, assumptions, dependencies, owners, mitigation actions and escalation items.
- Track project actions and commitments from meetings through closure, following up with project teams and stakeholders on overdue items.
- Coordinate weekly Scrum and project-status calls with delivery teams and consolidate updates for PMO reporting.
- Prepare weekly project status reports, steering committee decks, minutes of meeting, action trackers and management updates.
- Consolidate project information into a portfolio view covering delivery status, milestones, risks, issues, resources and financial performance.
- Coordinate resource planning and utilization tracking; maintain visibility of allocation and estimated versus actual effort through timesheet data.
- Work with delivery managers to collect project cost and utilization information and prepare monthly management reports.
- Track project cost against budget, identify variances and support the monthly financial governance cycle.
- Coordinate PO/PR and invoice governance, reconcile delivery milestones with revenue status and follow up on outstanding invoices.
- Prepare monthly revenue forecasts and payment-status dashboards for finance and leadership.
- Manage CRM deal-pipeline information and coordinate with delivery leads to identify potential upsell opportunities within existing accounts.
- Support key client accounts by coordinating delivery milestones, relationship-health updates, renewal readiness and client satisfaction follow-ups.
- Coordinate communication among project managers, delivery teams, finance, operations, IT and client stakeholders to keep commitments aligned.
- Escalate delivery risks, blockers, dependencies and overdue actions to appropriate stakeholders for corrective action.
- Present delivery, revenue, cost, resource and project-status information to Directors, VPs and the CEO.
- Promote adoption of the company project management framework and standardized PMO governance and reporting practices.

Senior Product Support Engineer (MES) – Tata Electronics, via Cantier Systems | Jul 2023 – Sep 2024

- Provided L2/L3 production support for MES platforms in high-availability automotive and electronics plants.
- Led incident, problem and root-cause analysis, contributing to a 15% improvement in system stability; supported go-live, cutover planning and hypercare.
- Performed API testing, system validation and performance tuning in line with SDLC quality standards.

- Improved customer satisfaction by 20% through proactive monitoring and preventive action; coordinated with IT, operations and vendors to resolve issues within SLA.

MES Trainer – Tata Electronics, via Cantier Systems | Nov 2022 – Jun 2023

- Supported MES rollout across multiple production lines by training end users and operators as part of a digital transformation program.
- Improved production data accuracy by 25% through process standardization and user enablement.
- Reduced support tickets by 20% through preventive training and coordinated with IT, operations and quality teams during deployment and stabilization.

PMO IMPROVEMENT & AI AUTOMATION

- PMO Control Tower Concept: Designed a centralized control tower concept to provide leadership with a single view of project health, milestones, risks and issues, resource utilization, project cost, revenue, PO/PR status, invoices and delivery performance.
- AI in PMO: Exploring practical applications of AI and automation for early risk identification, automated status reporting, resource utilization analysis, delivery forecasting and portfolio-level decision support.

EDUCATION

Bachelor of Business Administration (BBA), Bharathidasan University | Expected 2027

Diploma in Mechanical Engineering, Nachimuthu Polytechnic College | 2019 – 2023

TOOLS & TECHNOLOGIES

- PMO & Planning: MS Project, JIRA, SharePoint, Azure DevOps, DevOps Tracker
- CRM & Revenue: CRM platforms, deal pipeline tracking, revenue forecasting tools
- Manufacturing Systems: MES platforms, IIoT systems, Industry 4.0
- Documentation: ISO documentation, PMO templates, version-controlled artifacts
- Delivery Models: Agile, Scrum, Waterfall, Hybrid
- Automation & AI: Power Automate, generative AI concepts for PMO reporting
